

# KAMAL DHIMAN

AI / ML Engineer · Full-Stack AI Developer · B.Tech CSE (AI Specialization)

+91 94672 82054 · dhimankamal687@gmail.com · github.com/KamalDhiman-9 · linkedin.com/in/kamal-dhiman-0058b6276

## PROFESSIONAL SUMMARY

Results-driven **AI/ML Engineer** and Computer Science student (AI specialization) with proven hands-on experience designing and deploying intelligent systems. Built production-grade projects spanning **Natural Language Processing (NLP)**, **Deep Learning**, **Computer Vision**, and **full-stack AI application development**. Achieved ~98% accuracy on MNIST digit classification; engineered a cosine-similarity-based **Resume Analyzer** with real-time keyword gap detection. Proficient in **Python**, **TensorFlow**, **Keras**, **Scikit-learn**, **Flask**, and **REST APIs**. Certified by IBM, Oracle, IIT Delhi & Microsoft. Currently advancing AI skills through the **60 Days Claude Challenge (ABTalks)**.

## TECHNICAL SKILLS

|               |                                                                                                                                                                                                        |
|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| ML / AI       | TensorFlow, Keras, Scikit-learn, Deep Learning, Neural Networks, NLP, NLTK, Computer Vision, Model Training, Feature Engineering, EDA, Linear Regression, Pandas, NumPy, Matplotlib, Seaborn, Power BI |
| Languages     | Python, JavaScript, C++, C, Java, SQL                                                                                                                                                                  |
| Web & Backend | Flask, REST API, HTML5, CSS3, SQLite, MySQL, JSON, File I/O                                                                                                                                            |
| Tools         | Git, GitHub, Jupyter Notebook, VS Code, Regex, Power BI                                                                                                                                                |

## EXPERIENCE

### Python Developer Intern

Remote | Jun 2026 – Jul 2026

*Qskill*

- Developed and optimised **Python-based solutions** as part of a focused 1-month internship, applying core programming skills to real-world development tasks.
- Worked on **scripting, automation, and backend development** using Python, strengthening proficiency in writing clean, efficient, and maintainable code.

### AI / ML Engineer Intern

Remote | Feb 2026 – Apr 2026

*Code-A-Nova*

- Developed a **context-aware NLP chatbot** with persistent cross-session memory using Python and Flask, integrating SQLite-backed user profiling to auto-extract interests and deliver personalised recommendations — mirroring ChatGPT/Claude-style context retention.
- Built an **AI Resume Analyzer** using cosine similarity and TF-IDF vectorization (Scikit-learn + NLTK) that scores resumes against job descriptions, detects keyword gaps, and provides actionable feedback via Flask web app and CLI.
- Delivered **4 AI/ML projects** across 2 phases within a 2-month engagement, working with REST APIs, NLP pipelines, and deep learning frameworks in an agile remote environment.

## PROJECTS

### Chatbot with Memory (Context Persistence)

Apr 2026 – May 2026

Architected a production-style **conversational AI chatbot** with cross-session persistent memory, automatic user-profile extraction, interest tracking, and personalised resource suggestions — demonstrating advanced **NLP + full-stack integration**.

*Stack: Python · Flask · SQLite · Regex · JSON · HTML5/CSS3/JavaScript*

### AI Resume Analyzer

Mar 2026 – Apr 2026

Engineered an end-to-end **NLP pipeline** that parses resumes and job descriptions, computes **TF-IDF cosine similarity** match scores, identifies missing ATS keywords, and delivers structured improvement feedback through a Flask-powered web interface.

*Stack: Python · Flask · Scikit-learn · NLTK · pypdf · REST API*

### Handwritten Digit Recognition

Feb 2026 – Mar 2026

Designed and trained a **multi-layer deep neural network (DNN)** on the MNIST dataset achieving **~98% classification accuracy** across 10 digit classes; implemented custom training visualisations and loss-curve analysis with Matplotlib.

*Stack: Python · TensorFlow · Keras · NumPy · Matplotlib*

COVID-19 Trend AnalysisMar 2026

Performed **exploratory data analysis (EDA)** on patient-level COVID-19 data to uncover infection patterns, recovery timelines, and demographic trends; produced insightful visualisations communicating key public-health findings.

Stack: Python · Pandas · Seaborn · Matplotlib · EDA

Pharmacy Management SystemJan 2026 – Feb 2026

Delivered a full-stack **Flask web application** for a local pharmacy featuring real-time medicine search, dynamic inventory management, and secure prescription-upload/remote-ordering.

Stack: Python · Flask · JSON · HTML5 · CSS3 · JavaScript · File I/O

ACHIEVEMENTS & ACTIVITIES

- Currently participating in the **60 Days Claude Challenge with ABTalks** — an intensive AI productivity program using Claude AI for real-world problem solving, project building, and applied AI skill development.
- Secured **podium finishes in 8+ coding competitions** including national hackathons and programming contests, consistently outperforming peers in algorithmic problem-solving.
- Represented school in **academic Olympiads and inter-school quiz competitions**, earning distinctions and qualifying through multiple competitive rounds.
- Volunteered at an **NGO, old-age home, and school for underprivileged children** for 1 month — providing tutoring sessions and demonstrating leadership and social responsibility.
