PROFESSIONAL SUMMARY

AI/ML Engineer and Computer Science student (AI Specialization) with hands-on experience designing and deploying intelligent systems across NLP, Deep Learning, Computer Vision, and full-stack AI applications. Delivered a deep neural network achieving ~98% accuracy on MNIST digit classification and a cosine-similarity / TF-IDF resume analyzer with real-time ATS keyword-gap detection. Proficient in Python, TensorFlow, Keras, Scikit-learn, Flask, and REST APIs. Certified by IBM, Oracle, IIT Delhi & Microsoft, and HP LIFE.

EDUCATION

B.Tech, Computer Science Engineering (AI Specialization) — Hindu College of Engineering, Sonipat 2024 – 2028

Senior Secondary (Science Stream) — Navyug Public School, Sonipat 2023 – 2024 | Aggregate: 80%

EXPERIENCE

Python Developer Intern — Qskill (Remote)

Jun 2026 – Jul 2026

- Developed and optimized Python-based solutions during a focused 1-month internship, applying core programming skills to real-world development tasks.
- Built scripts for automation and backend development in Python, strengthening proficiency in writing clean, efficient, and maintainable code.

AI/ML Engineer Intern — Code-A-Nova (Remote)

Feb 2026 – Apr 2026

- Built a context-aware NLP chatbot with persistent cross-session memory using Python and Flask, integrating SQLite-backed user profiling to auto-extract interests and deliver personalized recommendations.
- Engineered an AI Resume Analyzer using cosine similarity and TF-IDF vectorization (Scikit-learn + NLTK) to score resumes against job descriptions, detect keyword gaps, and generate actionable feedback via a Flask web app and CLI.
- Delivered 4 AI/ML projects across 2 phases within a 2-month engagement, working with REST APIs, NLP pipelines, and deep learning frameworks in an agile remote environment.

PROJECTS

Chatbot with Memory (Context Persistence) — Apr 2026 – May 2026

- Architected a production-style conversational AI chatbot with cross-session persistent memory, automatic user-profile extraction, interest tracking, and personalized resource suggestions. *Stack: Python, Flask, SQLite, Regex, JSON, HTML5/CSS3/JavaScript.*

AI Resume Analyzer — Mar 2026 – Apr 2026

- Engineered an end-to-end NLP pipeline that parses resumes and job descriptions, computes TF-IDF cosine similarity match scores, identifies missing ATS keywords, and delivers structured improvement feedback through a Flask web interface. *Stack: Python, Flask, Scikit-learn, NLTK, pypdf, REST API.*

Handwritten Digit Recognition — Feb 2026 – Mar 2026

- Designed and trained a multi-layer deep neural network on the MNIST dataset, achieving ~98% classification accuracy across 10 digit classes; implemented custom training visualizations and loss-curve analysis. *Stack: Python, TensorFlow, Keras, NumPy, Matplotlib.*

COVID-19 Trend Analysis — Mar 2026

- Performed exploratory data analysis on patient-level COVID-19 data to uncover infection patterns, recovery timelines, and demographic trends; produced visualizations communicating key public-health findings. *Stack: Python, Pandas, Seaborn, Matplotlib, EDA.*

Pharmacy Management System — Jan 2026 – Feb 2026

- Delivered a full-stack Flask web application for a local pharmacy featuring real-time medicine search, dynamic inventory management, and secure prescription-upload / remote-ordering. *Stack: Python, Flask, JSON, HTML5, CSS3, JavaScript, File I/O.*

SKILLS

ML/AI: TensorFlow, Keras, Scikit-learn, Deep Learning, Neural Networks, NLP, NLTK, Computer Vision, Model Training, Feature Engineering, EDA, Linear Regression, Pandas, NumPy, Matplotlib, Seaborn, Power BI

Languages: Python, JavaScript, C++, C, Java, SQL

Web & Backend: Flask, REST API, HTML5, CSS3, SQLite, MySQL, JSON, File I/O

Tools: Git, GitHub, Jupyter Notebook, VS Code, Regex, Power BI

CERTIFICATIONS

AI Fundamentals (IBM) | Critical Thinking in the AI Era (HP LIFE) | Oracle AI Foundation (Oracle) | AI/ML Project Completion (Code-A-Nova) | Project Completion (Ediglobe) | Power BI Workshop (Froyo Technologies) | AI/ML Workshop (FITT & IIT Delhi × Microsoft)
